Subscribers to the SOUTH KENTUCKIAN will be given the benefit of the following cheap rates with other papers and periodicals:

COLDS.

Some Useful Hints—No Universal Specific for Colds.

There is no disease afflicting the human family more common than colds. It attacks the youngest and the oldest, the strongest and the weakest, of all climes, vocations and classes. When once cured, and even before it is entirely removed, the disease is likely to return without great care is used to escape its subtility. At no season of the year are we safe, and abroad, are we secure from contracting this unpleasant and dangerous malady. Our system sometimes seems to require but little excuse for taking colds. A slight draught from a half opened door, air from a window blowing on the neck, bed or underclothing a particle damp, moistened feet or a change in the weather, are sufficient, and sometimes from no conceivable cause do we suffer the severest.

Were the cause of colds always known we might usually prevent them, but this is not the case. Often, by paying more attention to the warmth of the body, dryness of the clothing, freedom from draughts of air, or wearing a small bag of camphor gum on the chest, or carrying a few crumbs of the same in the mouth on long drives in cold or stormy weather, many colds would be prevented, and our strength saved to battle those that are of a more epidemic nature.

The approach or first effect of a cold is felt differently. Sneezing, heaviness in the nostrils, itching in the nasal passages, sore throat, chilliness, headache, ringing in the ears or drowsiness, is but a skirmish of the battle that is to follow. These signs usually appear in the evening, and should be attended to at once, as a cold, once broken up, is more difficult to remove. The following morning, if no remedy has been used, the disease will be thoroughly seated, and cause catarrh in the head, or a cough in the throat or lungs. In two to five days, if care is used, the cold will have ripened and seen off, and rapidly by expectation of phlegm. If more cold is taken, pneumonia or consumption is liable to follow.

There is no universal specific for colds even in their earliest stages. That which will cure one patient, will have no effect on another, and a cure for a person to day may, ten years hence, be useless. But most cases of the young or middle-aged can be cured, if taken in season, by some of the remedies employed for this purpose. The following are a few of the methods used to pass off colds rapidly, and others will doubtless occur in the minds of the readers: Catnip tea made moderately strong with sugar and milk, chestnut leaf tea, or tea made from any of the mints, especially pennyroyal, hot lemonade, camphor oil, or a drop of oil of wintergreen in cold water. These should be taken after the patient is in bed to produce perspiration, and care must be taken the following day. A tablespoonful of water made hot with cayenne pepper, taken in sips to moisten the throat, and a draught of warm water, either of these should be taken after the patient is in bed to produce perspiration, and care must be taken the following day. A tablespoonful of water made hot with cayenne pepper, taken in sips to moisten the throat, and a draught of warm water, either of these should be taken after the patient is in bed to produce perspiration, and care must be taken the following day.

Where I have used Tongaline in cases of neuritis it has worked very satisfactorily so far.

R. W. Brady, M. D., Honesdale, Pa.

Once on a time a certain man got mad with the editor and topped him with a paper. The next week he sold his corn at four cents below the market price. Then his property was sold for taxes because he didn't read the Sheriff's sale. He was arrested and fined \$8 for hunting on Sunday, and he paid \$30 for a lot of forged notes that had been advertised two weeks, and the public had been cautioned not to negotiate for them. He then paid a big Irishman, with a foot like a forge hammer, to kick him all the way to the newspaper office, where he paid four years subscription in advance and had the editor to sign an agreement to knock him down and rob him if he ever stopped his paper again. Such is life without a newspaper.—New York Newsdealer.

CLIPPED.

The Sandwich Islands are for sale for \$14,500,000. The property consists of two islands, one extinct volcano and 700 cases of leprosy, all in middling repair.—Elizabethtown News.

"In old times a liar was legally punished by having a hole bored through his tongue." If this was the custom now, many a man's tongue would resemble a porous plaster.—Orange, Va., Observer.

Canon Farrar is about to have taken back with him to England \$15,000 as the proceeds of his lectures in this country—enough to start a Farrar bank.—Yeoman.

A Brakeman up in Aristotle.

One drummer held in his hand an unlighted cigar. Another drummer asked that the cigar be given him.

"I will," was the reply, if you first tell me correctly what is to become of it.

"All right, I predict that you will not give it to me."

"You are a bold, stupid you are. If I should give it to you your prediction being false, according to our agreement, I would keep the cigar."

"But, stay there," replied the other, "If you keep the cigar my prediction is true and the cigar must be mine."

My prediction cannot be proven false unless you give me the cigar."

You have lots of gall to think you can get something for nothing."

You have lots of nerve to stand up here and refuse to carry out your agreement."

"You're a liar."

"You are."

"Here," cried the brakeman, "no fighting here. What is the row about?"

The case was duly stated to the brakeman. That individual scratched his head, wiped the coal soot and perspiration from his lip with his gloved hand, and, after great deliberation, exclaimed:

"Give me the cigar."

The cigar was handed to him.

"This is a very interesting case," he said; "it reminds me of the syllogisms of Zeno, which we used to study at the round house on the problem of cause and effect illustrated by the example of two double-headed freight trains trying to pass each other on the same track, or the similar but more abstract problem of what is the result when an irresistible force comes in contact with an immovable body. But, gentlemen, as Aristotle used to say—oh, have you got a knife for your clothes?"

"Drummer No. 1 produced a knife and with it the brakeman cut off the end of the cigar."

"As Aristotle used to say, that is a reduction ad absurdum—a two-and-two-make-five case. But as Plato observed in his book on color blindness and bloated frogs, the impossible is possible only with the impossible and—by the way, have you got a match about your clothes?"

Drummer No. 2 produced a match.

"And now," continued the brakeman, addressing No. 1, "you promised to give this cigar to No. 2 if he would correctly guess what would become of it?"

"Yes."

"Well, he guessed that you would not give it to him, and, as you have not given it him, according to your promise the cigar no longer remains yours."

"Yes."

"And now, you other fellow, you think the cigar is yours because you correctly guessed what this man would do with it?"

"Yes."

"But if he should give the cigar to you then your guess would be a false one, and, according to the contract the cigar would be yours."

"Yes."

"Now see, gentlemen, the cigar belongs to neither of you. I think (puff, puff)—I think it is (puff, puff) a good cigar. Good day, gentlemen, and if you have any more syllogisms to quarrel over please let the stakes be a house and lot or a diamond ring, and I'll be glad to settle the dispute for you."

Interesting Facts.

There are 2,750 languages. America was discovered in 1492. A square mile contains 640 acres. Envelopes were first used in 1839.

Telescopes were invented in 1590. A barrel of rice weighs 900 pounds. A barrel of flour weighs 106 pounds.

A barrel of pork weighs 200 pounds. A flkin of butter weighs 56 pounds. The first steel pen was made in 1820.

A span is ten and seven-eighths inches. A hand (horse measure) is 4 inches. Watches were first constructed in 1470.

A storm moves thirty-six miles per hour. A hurricane moves eighty miles per hour.

The first iron steamship was built in 1830. The first lucifer match was made in 1829.

Gold was discovered in California in 1848. The first horse railroad was built in 1826-7.

The average human life is thirty-one years. Coaches were first used in England in 1569.

Modern needles first came into use in 1545. Kerosene was first used for lighting purposes in 1853.

The first newspaper was published in England in 1588. The first newspaper advertisement appeared in 1652.

Until 1776 cotton spinning was performed by the hand-spining wheel. Glass windows were first introduced into England in the eighth century.

Albert Durer gave the world a prophecy of future wood engraving in 1527. Measure 200 feet on each side and you will have a square acre within an inch.

The first complete sewing machine was patented by Elias Howe, Jr., in 1846.

The first steam engine on this continent was brought from England in 1773.

The first knives were used in England, and the first wheeled carriages in France in 1559.

The present national colors of the United States were not adopted by congress until 1777.

Blasting at Hell Gate.

[Main Record.] The great explosion at Hell Gate, for which preparations were being made for several years, took place last fall. Flood Rock was situated about mid-channel, due north from Hallett's Point, and from twelve hundred to fifteen hundred feet from the Astoria shore. It had an area of about eighty acres, of which only about two hundred and fifty square feet showed above high water mark.

The same general plan of operations was adopted here that proved so successful at Hallett's Point. Around the highest point of the rock a sea-wall was built, the enclosed area being filled with broken stone, to afford space for erecting the necessary buildings. The artificial island thus created was about seven feet above high water. In the center the main shaft was sunk, having a depth of sixty-seven feet. A few feet away was another shaft, forty feet deep, opening into the same heading as the main shaft. The smaller shaft was used for machinery, and the tubes for conveying the compressed air, which drove the drills and gave the men at work the necessary fresh air which could not be introduced otherwise. The main shaft was used for removing the excavated rock.

The first series of headings branched out from the main shaft at a depth of about forty feet, and from the bottom of the shaft directed another series of headings directly under those known. Those headings branched at right angles every twenty feet, and were sixty in number on either side. This double system of headings was employed, in order to gain a sufficient depth after the explosion, without the labor and expense of dredging to remove the broken rock, as was necessary at Hallett's Point. The total length of tunneling was about four miles, consisting of twenty-four galleries running north and south, and forty-six running east and west. The longest of these was 1,300 feet in length, 6 feet wide, and 10 feet high. There was a thickness of from 10 to 25 feet between the roof of the top of galleries and the water. There were 47 pillars left to support the roof. These were 15 feet square. The whole rock was honeycombed with headings. Eighteen hundred and thirty-two headings were employed in preparing the blasts and making the receptacles for the cartridges. In round figures, 80,000 cubic yards of rock have been removed. This was carried to the surface by means of an elevator in the main shaft, to which on narrow-gauge trucks running through the tunnel, thirteen thousand two hundred and eighty-eight chambers for holding the cartridges—each three inches in diameter and about nine feet in length—were hoisted by the pillars and roof at distance of four or five feet apart. These chambers were filled with "Rackarock" dynamite cartridges, of which there were about 47,000, each being two and a half inches in diameter, two feet in length, and containing six pounds of explosive. The cartridges were made of thin copper. It was found some months ago that the cartridge cases had corroded, and all out and put new ones in, which had been dipped in molten beeswax. The latter expensive commodity was used in this work. In addition to the "Rackarock" cartridges, there were several hundred ordinary dynamite cartridges, to which the wires connecting with the donating batteries were attached. It was through these latter that the simultaneous shocks causing the explosion of all the cartridges were produced. It is estimated that 285,000 pounds of explosive were used. Over 50,000 feet of wire were used in connecting the blasts and the batteries.

Consumption Cured.

An old physician, retired from practice, having had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure of Consumption, Bronchitis, Catarrh, Asthma and all throat and Lung Affections, also a positive and radical cure for Nervous Debility and all Nervous Complaints, after having tested its wonderful curative powers in thousands of cases, has felt it his duty to make it known to his suffering fellow-men. Actuated by this motive and a desire to relieve human suffering, he has decided to give away this remedy, and he desires it to be known to all who desire it, this cure is a German, French or English, with full directions for preparing and using. Sent by mail by addressing with stamp, naming this paper, W. A. Novak, 149 Power's Block, Rochester, N. Y.

Here's to our brilliant and erudite friends at Cincinnati. May they knock the stuff out of the turkey with as much gusto as they would knock it into a ballot-box.—Courier-Journal.

ODDS AND ENDS.

[Washington Gazette.] An alleged doctor in Georgia, to relieve the carache, inserted a bunch of cotton saturated with hot glue in a young man's ear. The glue got cold, and it became necessary to call in a real physician to extract the cotton.

A Boston man has written an elaborate article to prove that "before the close of the next century, all North America, including the British possessions, Mexico and Central America, will belong to the United States."

No "native American party" would stand the ghost of a chance in Minnesota, the population of which, according to the census just taken, is nearly half foreign. The native-born persons number 687,120; the foreign-born persons no less than 427,513.

If you should chance to read this copy of the SOUTH KENTUCKIAN, and are not a subscriber, we would be glad to have you make up your mind to take it. Just ask yourself the question if it is not the cheapest paper you can get for the money, and where else you can get an eight-column paper twice a week for only \$2.00 a year, that will give you as much general news?

Are You Going to Kansas Missouri, Colorado, California or Any of the Western States?

If you should avail yourself of the advantages that are now offered by the Kansas City Route, the only direct route from the South to the West and Northwest. This line runs its entire trains, with Pullman Palace Sleeping Cars, and free Reclining Chair Cars, from Memphis to Kansas City, saving many hours time over any other route. If you are going over any other route, if you are purchasing your tickets via Memphis and the Kansas City Route, send for large map of this Route; mailed free.
